### Alkaline Hydrolysis/Aquamation in British Columbia

Dear Honourable Michael Farnworth:

In reference to your letter dated April 21, 2021, in response to the British Columbia Women's Institute resolution in support of regulation amendments to enable Alkaline Hydrolysis/Aquamation in British Columbia.

We can appreciate that with the disasters that the government has had to deal with in the last year that our resolution has not been a priority; however, with 2021 being a year of climate disasters how can this not be a priority.

You stated that in order to pursue the inclusion of Alkaline Hydrolysis additional research, public analysis and stakeholder engagement is required. What advancements have been made in research, public policy, and stakeholder engagement?

We are concerned that overt biases from large funeral, cemetery and crematorium corporate entities unduly influence the process.

Will changes to CIFA be considered and acted upon in 2022?

As this is a real concern in our Province we look forward to your immediate response.

For Home & Country,

Brenda Devauld,  
BCWI President
